Art Unit: 3672

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 2193-2269 and 5081-5090, drawn to a method of increasing the permeability of a coal formation, classified in class 166, subclass 308.
- II. Claims 2270-2308, drawn to a method of increasing the porosity of a coal formation, classified in class 166, subclass 302.
- III. Claims 5091-5100, drawn to a method of pyrolyzing and recovering hydrocarbons from a coal formation, classified in class 166, subclass 302.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as in a coal formation penetrated by horizontal wells and/or access tunnels, i.e., not requiring steps of increasing the permeability or porosity of the coal formation. Also, invention I could be practiced to increase the permeability, e.g., by fracturing without necessarily increasing the pore space or porosity. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3672

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. This application contains claims directed to the following patentably distinct species of the claimed invention:

A. Heating a coal formation using an electrical heater(s). Claims 2196, 2235, and 2273 exemplify this species.

B. Heating a coal formation using surface burners. Claims 2197, 2236 and 2274 exemplify this species.

C. Heating a coal formation using a flameless distributed combustor(s). Claims 2198, 2237 and 2275 exemplify this species.

D. Heating a coal formation using a natural distributed combustor. Claims 2199, 2238 and 2276 exemplify this species.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 2193-2195, 2200-2234, 2239-2272, 2277-2308, and 5081-5100 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon,

Art Unit: 3672

including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
